

Juror Qualification Report 2017

Supreme Court of Appeals of West Virginia
Administrative Office
Building 1, Room E-100, State Capitol
1900 Kanawha Blvd. East
Charleston, WV 25305-0830

March 30, 2018

Background

In accordance with §52-1-16 of the West Virginia State Code, circuit clerks provide an annual report of juror qualification questionnaires to the Administrative Office of the Courts. West Virginia Code specifies that “the clerk shall make an annual report no later than the first day of March of each year...with the following information: whether the clerk employed a jury box or jury wheel for the year reported, and the age, race and gender of each person for whom a juror qualification questionnaire has been received.” Staff at the Administrative Office compile summaries of the questionnaires provided by the circuit clerks and generate an annual report. Pursuant to the code, the Administrative Office “provide[s] this information to the president of the Senate and the speaker of the House of Delegates on an annual basis, no later than the first day of April of each year.”

This report summarizes annual reports received for activity in 2017. The following sections describe the level of reporting; the number of jurors; the gender, race and age of the jurors; and the method used to select jurors.

Highlights

- All counties submitted an annual report on juror qualification to the Administrative Office.
- A total of 36,689 juror qualification questionnaires were completed. Berkeley County (3,012) and Ohio County (2,692) reported the largest number of questionnaires.
- Males completed 47.6 percent of the questionnaires and females completed 50.5 percent. The remaining 1.9 percent of jurors did not report gender.
- Whites completed 92 percent of the questionnaires, Blacks completed over 2 percent, and other reported races combined completed less than 1 percent. Race was not reported or indicated on 4.7 percent of questionnaires.
- There were more jurors (4,414) in the “56-60” age category than any other age category.
- 44 percent of the counties used the jury wheel to select jurors, 14 percent used the jury box, and 42 percent used a computer selection method.

Results

Counties Reporting

All counties submitted juror qualification reports for activity between January 1 and December 31, 2017.

Total Jurors Qualified

A total of 36,689 individuals (2 percent of the state population) completed a juror qualification questionnaire in 2017. This represents a decrease of a fraction of one (0.14) percent from 2016. The number of individuals completing the questionnaire ranged from a low of 27 in Hardy County to a high of 3,012 in Berkeley County. On average, 676 individuals completed questionnaires per county.

Race/Ethnicity

Of the 36,689 jurors who completed a juror qualification questionnaire, 33,767 (92.04%) reported their race as White. There were 861 Black jurors (2.35%), 186 Asian jurors (0.51%), 90 Native American jurors (0.25%) and 65 Hispanic jurors (0.18%). Race was marked as “other/unknown” for 1,720 jurors (4.69%). This includes questionnaires without a race option selected. According to the United States Census Bureau’s¹ website, in 2016, 92.3 percent of the West Virginia population was White, 3.6 percent were Black, 1.5 percent were Hispanic, 0.8 percent were Asian, 0.2 percent were American Indian or Alaska Native, and 1.7 percent were another race. The population demographics for 2017 are not available on their website.

Graph 2: Percent of Jurors and Population by Race/Ethnicity *

**Please note when summing the distribution of race calculated from the census it will not total 100 percent. Race and ethnicity are reported separately in census reporting. Thus in census comparison data, in addition to race, all respondents are categorized by membership in one of two ethnicities, which are "Hispanic or Latino" and "Not Hispanic or Latino". However, in WV Juror Questionnaires, Hispanic is included as a selection within the race category. So, while on census reporting an individual may choose a race such as Black or White and Hispanic as their ethnicity, on juror reporting they would only choose the one of these with which they most identify (i.e. Black or Hispanic).*

Age

The number of individuals in each age increment ranged from a high of 4,414 individuals (12.0%) in the “56-60” category to a low of 2,017 individuals (5.5%) in the “over 70” category. The age was missing or unknown for 208 individuals (0.6%). A table listing totals for all age categories by county is provided in Table 5 of the Appendix.

Graph 3: Count of Jurors by Age Category

Jury Selection Method

In 2017, 24 counties (44%) used the jury wheel and 8 counties (14%) used the jury box to select potential jurors. A computer selection method was used in 23 counties (42%).
